PROMPTBI.

Conversational AI for Instant Business Intelligence Dashboards

Ask a question. Get a dashboard.

No SQL. No analysts. No waiting.

GFG Hackfest 2026
Team: Lunara

01 / THE PROBLEM

The Data Bottleneck

Data is locked behind SQL

Non-technical users can't access insights without engineering help.

Data teams are overloaded

Analysts spend 60% of time on basic report requests instead of real analysis.

Decisions are delayed

Waiting days for a simple chart means missed opportunities and slow response.

PromptBI — Ask. Analyse. Act.

A single text box replaces your entire BI stack.

01
TYPE
Ask a plain-English question

02
QUERY
AI generates SQL & queries data

03
VISUALIZE
Right chart auto-selected

04
INSIGHT
AI writes a one-line insight

Result: Any team member gets a live interactive dashboard in seconds — no SQL, no ticket, no wait.

3 Queries. 3 Complexity Levels.

EASY

"Show monthly views trend over time"

Chart: Line chart — 24 months of views data Insight: *"Jan 2025 was peak month at 429.3M views"*

MEDIUM

"Compare views and engagement rate by content category"

Chart: Bar chart — 6 categories compared Insight: *"Gaming leads engagement at 6.41% despite Vlogs leading views"*

HARD

"Which region has the highest sentiment score and does ad monetisation affect viewership?"

Chart: Multi-metric — sentiment bar + ads comparison Insight: *"Ads have 0.2% impact; Tech Reviews only negative sentiment category"*

Architecture

REACT
Vite + Recharts

AXIOS
REST API calls

FASTAPI
Python backend

GEMINI
2.0 Flash LLM

PANDAS
1M row CSV dataset

User Query → axios POST /query → Gemini SQL generation → Pandas aggregation → JSON → Recharts

- Skeleton Loading
- Sequential Animations
- AI Insight per Chart
- CSV Upload Support

05 / DATASET

1,000,000 Real Video Records

2 years of platform data · 12 columns · 2024–2025

10.01B Total Views	**6** Categories	**5** Regions
5 Languages	**6.40%** Avg Engagement	**10,012** Avg Views/Video

USP

Accuracy

- Correct SQL for all 8 query types via Gemini 2.0 Flash
- Right chart type auto-selected for every query
- Graceful error handling for vague or unanswerable queries

Aesthetics & UX

- Dark BI dashboard with cyan + yellow + red accents
- Skeleton loading states, sequential chart animations
- Clickable example chips, query history, export button

Innovation

- 3-section horizontal layout: Query → Charts → AI Insights
- Gemini generates a one-line insight per chart in real time
- CSV upload support — bring your own dataset (bonus +20)

Thank You.

Your data answers. In plain English.
